## World's Best Specialized Hospitals 2021

In our nine decades, *Newsweek* has covered all aspects of health care—scientific challenges, economic disruption, the occasional medical miracle and most of all, what these developments mean for our readers. As part of that commitment, we've partnered with *Statista Inc.*, the global market research and consumer data firm, to rank the world's best hospitals.

Now we're expanding that expertise by looking at specialties. In this chapter, we rank the best hospitals in [cardiology](#), [oncology](#) and [endocrinology](#). Each list includes a ranking of the 50 best global hospitals, while ranks 51 to 100/200 are sorted alphabetically. If you or a loved one needs specialized care in one of those areas, as millions of us do, you want to know which hospitals or medical centers have state-of-the-art facilities and the most knowledgeable, accomplished physicians.

Where will you have access to the best diagnosticians, highest level of care and most effective treatments? We're proud to offer our readers these independent, authoritative and reliable *Newsweek/Statista* rankings.

If your hospital is listed below, [you can find out more about the licensing options visiting the Statista website](#).

| -    | UPMC Presbyterian & Shadyside                                | <b>UPMC Heart and Vascular Institute</b>                        | Pittsburgh, PA  | United States  |
| -    | Vancouver General Hospital                                   | <b>UBC Divisions of Cardiology &amp; Cardiovascular Surgery</b> | Vancouver       | Canada         |
| -    | Vanderbilt University Medical Center                         | <b>Cardiology</b>   | Nashville, TN   | United States  |
| -    | Wythenshawe Hospital   | <b>North West Heart Centre</b>                                  | Manchester      | United Kingdom |
| -    | Yale New Haven Hospital                                      | <b>Yale New Haven Hospital Heart and Vascular Center (HVC)</b>  | New Haven, CT   | United States  |

### Methodology:

The ranking features the top 200 hospitals in both Oncology and Cardiology and the top 100 in Endocrinology. While global top hospitals are represented in multiple medical fields, leading specialized hospitals that are highly renowned in one or two specific medical fields or treatments also made it into the list in their specialization.

Hospitals which are not accessible to the public and/or are very small were excluded from the ranking since they were very unlikely to receive enough recommendations to make the final list.

The ranking is based solely on peer recommendations for specific areas of expertise from a global survey of medical professionals. Based on the underlying methodology, each list includes a ranking of the 50 best global hospitals, while ranks 51 to 100/200 are sorted alphabetically.

[Download the full methodology here.](#)

### Licensing Information:

If your hospital is listed above, [you can find out more about the licensing options visiting the Statista website.](#)

### Global Board of Medical Experts:

The global board of medical experts was founded by [Statista](#) to support the World's Best Hospital Project. The board is an independent body that is tasked with the continuous development of the quality and scope of the project. [Current members of the board of experts are listed here.](#)
